To whom this may concern:

After years of correspondence and tens of thousands of dollars to patent attorneys, it was brought to my attention the status of this application. In researching what paper work I have it is my conclusion that this particular machine, its design and unique capabilities have been severely misrepresented by this attorney. I apologize for not responding to this matter sooner but a medical situation arose some time ago which made it extremely hard for myself to respond correctly. After a long period of conventional and over-the-counter treatment failed, surgery was done 12 days ago. This has brought considerable relief and has allowed myself to be able to focus on the matters at hand. I respectfully request the opportunity to send prints along with a simple but detailed explanation of the working parts and a compact disc with actual visuals of the machine working in field. I will do my best to answer any and all questions the patent office personnel may have in a timely fashion. I would appreciate the opportunity to work with you on this matter. It will give me a better understanding of the working mechanics of the patent office.

Thank you,

John O. Gurosik
